CIRCUMNAVIGATION OF MADAGASCAR

Discover the marvels of the 'eighth continent'
aboard the MS Serenissima with Guest Speaker Daniel Austin

3rd to 22nd February 2022

NOBLE CALEDONIA

Masoala National Park

Ankarafantsika National Park

Join us for this unique opportunity to circumnavigate the island of Madagascar on what will be our most comprehensive exploration of this extraordinary island yet. Still relatively unexplored, there is minimal infrastructure in many parts of the island and for those wishing to explore the island in some depth, doing so by small ship, especially one as well-suited as the MS Serenissima is far preferable to exploring by any other means.

The world's 'eighth continent', Madagascar long remained obscure as a destination and the animals, plants, landscapes and people that make up this thousand mile long island are unlike anywhere else in the world. Our expedition includes thirteen days on the island allowing for the opportunity to explore rainforests full of wildlife including lemurs, chameleons and indigenous birdlife as well as seeing the underwater world and village life. Our days will be spent exploring ashore, often traversing over rugged terrain and walking through spectacular rainforests and each evening we will have the benefit of returning to our comfortable ship to relax and look forward to the next adventure.

In addition to the breathtaking scenery, the region abounds with strange and wonderful plants and trees, countless varieties of birds and abundant wildlife including the iconic lemur. The long separation from the African mainland has given rise to its amazing number of endemic species of flora and fauna and its people are also unique having descended from Malay-Polynesian mariners who sailed from South East Asia between 1500 to 2000 years ago. Later arrivals included slaves from Africa, traders from Arabia, India and Portugal and more latterly French colonials.

With the vessel's fleet of Zodiacs for forays ashore, allowing access to the wonderful places denied to larger ships, you can enjoy ample time to explore and encounters with fabulous endemic wildlife in this immensely rich and timeless corner of the Indian Ocean. Your experience will be made all the more memorable by our expert crew and officers who, along with our expedition team including marine biologists, ornithologists and botanists have many years of experience in the region.

Nosy Hara

Avenue of Baobabs

Guest Speaker – Daniel Austin

Daniel is a travel writer, naturalist, photographer and tour lecturer who specialises in the exotic Indian Ocean island of Madagascar. He visits Madagascar every year to explore and photograph its diverse wonders. His fascination with this enigmatic country extends not only to its unique flora and fauna, but also to its people, culture, history, geology and beyond. Daniel has written three books about Madagascar and contributed words and images to countless others. He also presents occasional

lectures on the country, including at the Royal Geographical Society, as well as on specialist tours of the island. In addition, Daniel is Secretary of the Anglo-Malagasy Society, a UK-based organisation founded in 1961, which holds events and meetings in London to promote knowledge of Madagascar amongst British people and to foster relations between the two countries. Daniel is the founder of the Madagascar Library, a private collection of some 3,000 books, maps and other documents about the country, available for use by academics, journalists, historians and other researchers. He studied linguistics and cognitive science at the University of Cambridge and at UCL in London, as well as engineering science at the University of Oxford.

The Itinerary

Day 1 London to Mauritius. Fly by scheduled indirect flight.

Day 2 Mauritius. Arrive today and transfer to the MS *Serenissima* moored in Port Louis. Enjoy welcome drinks and dinner as we sail this evening.

Day 3 Reunion. We arrive at breakfast in Reunion where we have a choice of excursions. On a full day tour we will visit the central highlands where spectacularly rugged peaks of dormant or extinct volcanoes cradle huge amphitheatres known as cirques, where mountains tower to over 10,000 feet and beautiful waterfalls plummet hundreds of feet. The rich soil and mellow climate produce a lush and verdant landscape which is dotted with villages and towns with a uniquely French atmosphere. Fields of sugar cane and plantations of tropical fruits, vanilla and all manner of spices perfume the air. We will enjoy views from the Nez des Boueufs and see the Piton de la Fournaise crater. After enjoying a creole lunch in a local restaurant we will visit the 'Cite du Volcan' museum. Alternatively enjoy a morning tour to a vanilla plantation in St Andre where we learn about the history and culture of this integral part of Reunion's heritage. Continue to Salazie, a verdant landscape and home to many waterfalls including the 'Voile de la Mariee' before spending some free time in St Denis on the way back to the MS *Serenissima*. This afternoon is at leisure before we set sail this evening.

Day 4 At Sea. Spend the day at sea as we sail towards Madagascar. Maybe join a lecture or find a spot on deck to relax.

Days 5 & 6 Taolagnaro, Madagascar. Our first call in Madagascar is the south eastern port of Taolagnaro, also known as Fort Dauphin. This was the first French settlement in Madagascar, situated on a peninsula overlooked by the Anosy mountains. We will moor overnight and during our afternoon and morning here we will offer a choice of excursions including Nahampoana Private Park. The reserve is only 67 hectares but home to four species of lemur including ring-tailed and sifakas whilst the gardens showcase Madagascan plants with three-cornered palms and spiny *Desiderata* trees. A tour of Taolagnaro will include the market, public gardens and the Fort Flacourt Museum where we will learn about the arrival of the Magalasy people to Madagascar and the historical links with Reunion. Also enjoy walks in the forest at the Madena Conservation Zone, a 200 hectare park protected from the region's mining industry and where we hope to see bamboo lemur and different varieties of orchids.

Day 7 Tulear. Having sailed around the southern tip of Madagascar we arrive in Tulear at lunchtime. This afternoon choose a drive to the Antsoy Arboretum which is entirely devoted to the conservation of the plants from the south west of Madagascar and, after more than 30 years of hard work, offers a densely kept selection of flora presenting a typical sub-arid thicket with baobab trees towering over the smaller plants. We will see the four hectare botanical garden which comprises over 900 species of plants of which 90% are endemic to the region. Alternatively visit the Reniala Private Reserve, a small area of just 60 hectares but containing a spiny forest which is unique to south eastern Madagascar. The park is home to 200 plant species including baobabs as well as being a haven for birders with sightings of paradise flycatchers, Madagascar hoopoe and Madagascar crested drongo.

Day 8 Andavadoaka & Nosy Hao. The vessel will anchor this morning off the small fishing community of Andavadoaka, home to the Vezo fishing people. The area offers the most diverse marine ecosystem on the southwest coast. It is also the base for Blue Ventures, a marine conservation society that has helped the local villagers invest in their community by way of training local guides and showing ways to preserve their resources. We hope to learn more about the local projects before sailing over lunch to Nosy Hao to discover the sandy white beaches where we can enjoy a swim in the warm waters.

Day 9 Morondava. From our anchorage off the town of Morondava, we will use the Zodiacs to land on the local beach. From here there will be a choice of excursions to explore the local region. A half day morning tour will visit the Avenue de Baobabs. Of the eight baobab species in the world, six are endemic to Madagascar and here we will see the *Adansonia grandidieri* species with a row of 20 to 25 trees which border the gravel road. We will

Panther Chameleon

learn about the trees and their spiritual significance before returning to Morondava and exploring the local market. Alternatively, join a full day excursion to Kirindy Forest. Situated approximately a two hour drive from Morondava, we will pass the Avenue de Baobabs as we travel north. Kirindy is a 10,000 hectare, dry deciduous forest, one of the most endangered in the world where the flora and fauna includes many endemic species. Here we find three species of baobab, many birds and reptiles including snakes, tortoises and lizards. Eight species of lemur reside here including the pale form marked lemur.

Day 10 At Sea. Our lecture programme resumes as we continue our journey around the Madagascan coast.

Day 11 Mahajanga. Mahajanga is a major port in northwest Madagascar situated on the Betsiboka River and is our base for a full day excursion to Ankarafantsika National Park. This deciduous forest is a haven for birds, lemurs and reptiles and on a choice of walks, we will explore with our guides. Eight species of lemur have been observed here including the famous Microcebus, the smallest primate in the world. Meanwhile over 120 species of birds nest here and we will keep an eye out for the Madagascan fish eagle and banded kestrel whilst the 44 species of reptile include chameleon, turtles and crocodiles that live in Lake Ravelobe. We will enjoy lunch in the park and in the afternoon there will be options to join further walks or watch for birdlife at the nearby lake before returning to the MS Serenissima.

Day 12 Nosy Tanikely. We arrive mid-morning at the Nosy Tanikely Island Marine Reserve, an uninhabited island which offers snorkelling opportunities and wonderful beaches. We will take the chance to either swim in the clear waters or snorkel over the corals keeping an eye out for reef fish, turtles and morays. Alternatively our naturalists will lead guided walks on the island where we may see the resident lemurs, fruit bats and hermit crabs and enjoy fantastic views from the lighthouse on the island's highest point.

Day 13 Nosy Hara. As we continue our journey along the western coast of Madagascar we will find a number of strangely shaped limestone islets that dot the aquamarine-coloured sea. The expedition team will decide on the most suitable island for landing, such as Nosy Hara with its abundant birdlife and great places to swim off the beach. We will spend the day exploring the island on foot, walking through dense woodland and observing the unusual vegetation. Alternatively join a Zodiac cruise around the islands and a chance to snorkel over the coral.

Day 14 Diego Suarez. Overnight we will have sailed around the northern tip of Madagascar and first thing this morning we will enter dramatic

Diego Suarez, a stunning natural harbour with a cosmopolitan mix of inhabitants including Creoles, Indians, Chinese, Comorans and Arabs. This afternoon choose from a city tour visiting the Commonwealth Cemetery and Place Joffre, or the Malagasy Rain Forest at the Mount Amber National Park. Dividing into short and long walk parties we will go in search of lemurs, chameleons and endemic birds as we explore the rain forest. Return to the ship for lunch and an afternoon at sea.

Days 15 & 16 Masoala National Park & Nosy Mangabe. We will spend a day and a half exploring from our anchorage in Antongil Bay. We visit Madagascar's largest protected area, the Masoala National Park which comprises coastal rainforest, flooded forests and marsh and mangroves. Mammal species encountered include the red-ruffed lemur, the red-fronted brown lemur and the ring-tailed mongoose. The park is also home to various species of brightly coloured Mantella frogs and all manner of extraordinary chameleons. Masoala is also a refuge of the endangered Madagascar red owl, Madagascar serpent eagle and many endemic bird species. We will run a series of walks for all levels during our time here whilst you will also have the option to swim off the beach or perhaps visit the local village. We will also explore Nosy Mangabe, a 520 hectare island reserve. Here we find one of the most diverse areas of virgin rainforest in Madagascar which has also been an important research centre since the mid-1960s when several aye-ayes and lemurs were released into the forest. We will use our Zodiacs to land on the beach next to the forest and a series of nature walks will be offered to look at the varied trees, plants and ferns and we also hope to spot chameleon, lizards and black and white ruffed lemur. For the birders, we will keep an eye out for the Madagascar buzzard, kingfisher and paradise flycatchers.

Day 17 Taomasina. Our last call in Madagascar is at Taomasina, the country's main port and second largest city but also the gateway to the Pangalanes Canals, a series of rivers, waterways and lakes that extend for over 400 miles down the island's east coast. Used mainly for transportation and fishing, the canals are also home to unspoiled beaches, lagoons and lakes whilst providing access to national parks and private reserves. This morning we will take a local boat cruise through the canal to enjoy the scenery followed by a nature walk in one of the private reserves. Enjoy lunch in the reserve before returning to Taomasina this afternoon. Alternatively visit the Ivoloana Zoological Parc, a 282 hectare property combining a small zoo where we will see up to 12 species of lemur as well as indigenous tortoises and chameleons. Meanwhile in the surrounding forests we can see wild lemurs or malachite kingfishers on one of the many walking trails.

Day 18 At Sea. Enjoy the day at sea to relax and reflect on our Madagascan adventure as we sail back to Mauritius.

Day 19 Mauritius to London. Disembark this morning and transfer to the airport for our scheduled indirect flight to London.

Day 20 London. Arrive this morning.

PRICES PER PERSON

Not Included: Travel insurance, Madagascan visa.

MS SERENISSIMA

Harald Jarl Lounge

Venice Restaurant

Andrea Lounge

The charming MS Serenissima began her career as the Harald Jarl, cruising the Norwegian coastline and fjords. Since 2003, when she was extensively renovated, she has been operating as a classic cruise ship. Previously known as the MS Andrea, she was upgraded again in 2013 and started her new life as the MS Serenissima. With her small size she can navigate into small, remote ports inaccessible to the big cruise ships and appears an impressive sight when moored. With her fleet of Zodiacs, she is capable of both destination and expedition cruising.

Your Cabin/Suite

Accommodating no more than 95 passengers, there are eight different grades of cabins arranged over five decks, and all feature either windows or portholes. The cabins are attractively designed for comfort and convenience. All cabins are fully air conditioned with an en-suite bathroom with shower (please note cabins 601 - 605 and 507 have a bath with shower attachment) and a selection of toiletries in addition to a hairdryer, robes and slippers. All cabins come equipped with telephone, flat screen television, safety deposit box and other thoughtful appointments. Refillable water bottles are available in all cabins for use on board. Due to the very nature of the ship, the cabins vary in shape and size, adding to the vessel's overall charm.

Your Dining

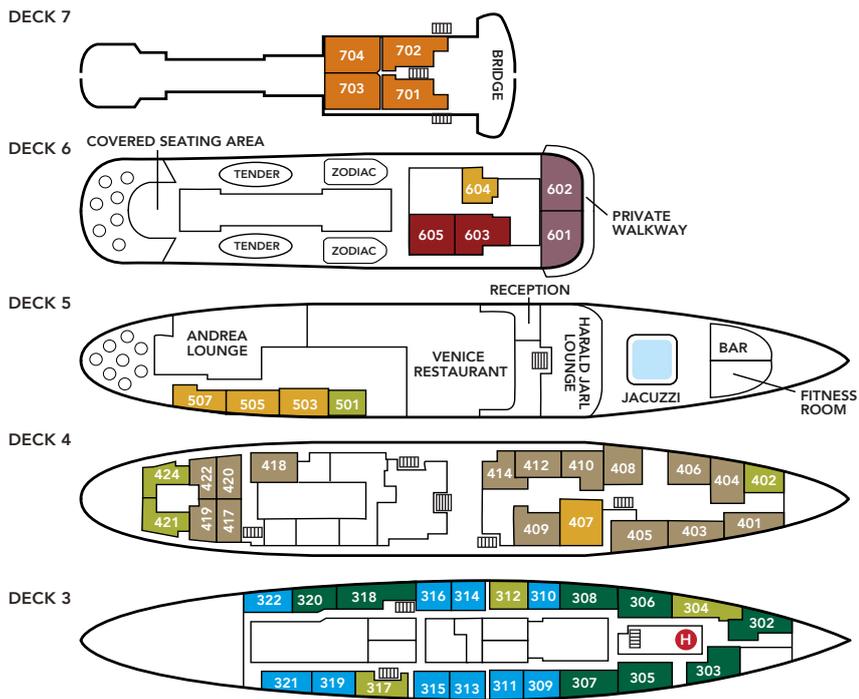

The free seating Venice Restaurant accommodates all guests in one sitting and, with its Deck 5 location, all of the tables benefit from great views. The picture windows also make the restaurant wonderfully light and airy. Breakfast is served buffet-style with cooked dishes available and eggs to order by the ship's accomplished chef. Lunch is also served buffet-style

with hot and cold dishes available. Dinner is served à la carte and is four courses, except at the Captain's Dinner, which is a six course affair. Where possible, local produce is sourced for an authentic dining experience. A choice of red or white wine, beer and soft drinks is included at lunch and dinner. In good weather there are al fresco dining facilities available and tea and coffee are available around the clock in the Andrea Lounge.

Your Space

The facilities on board include two lounges – the larger Andrea Lounge is comfortable and spacious and the smaller Harald Jarl Lounge is more intimate. There is also a small library and Wi-Fi is available at an extra cost throughout the vessel. The outside areas really are something special. A spacious observation deck allows 360 degree views of the passing scenery. From here, step down to the lido area with Jacuzzi and outside bar. The covered seating area at the back of Deck 6 is ideal for relaxing with a drink in hand. Perhaps, one of the best known and loved features of this vessel is its unique style. During the major refit in Sweden the then owners commissioned Swedish interior designers to create a country house style which has recently been updated with some Art Deco styling which works particularly well on a vessel of this vintage, providing intimacy and a classic nautical sensibility often lacking in larger vessels.

MS SERENISSIMA DECK PLAN & CABINS

- STANDARD STATEROOM
- DELUXE STATEROOM
- SERENISSIMA SUITE
- CLASSIC STATEROOM
- JUNIOR SUITE
- STANDARD SINGLE
- SUPERIOR STATEROOM
- OWNER'S SUITE

NB. Please note cabin sizes vary in each category and measurements shown are approximate.

SERENISSIMA SUITE
(25 square metres)

OWNER'S SUITE
(22 square metres)

JUNIOR SUITE
(21 square metres)

DELUXE STATEROOM
(15 to 25 square metres)

SUPERIOR STATEROOM
(11.5 to 18 square metres)

CLASSIC STATEROOM
(14 to 19 square metres)

STANDARD STATEROOM
(10 to 11.5 square metres)

STANDARD SINGLE
(7 to 12.5 square metres)

During this voyage you will be visiting out of the way destinations and will be accompanied by an expedition team. Landings and excursions will be made by Zodiac landing craft. This cruise will appeal to the more adventurous and those who enjoy the natural world.
